# Sunpack 20 Lastest Innovation in Fishboxes

Norwegian media have recently written several articles reporting of dangerous road conditions being caused by water run-off from fishing trailers. Sunde have responded to the concerns raised in these articles by working with their customers to find a solution to the problem.

Our parent company Sunde, based in Ålesund, Norway have developed a new salmon box without run-off. The new Sunpack 20 is a practical solution which we believe will solve the problem.

“The patent pending solution is fully designed and ready for sale, but Sunde still performs customer trials to optimize all properties. When developing a new product, there are always small details to be improved, and this is a process we will go through to gain feedback from the market with possible improvements. We are in talks with our customers about adopting the solution on a larger scale” says Director of Brødr. Sunde, Rolf Fagervoll.

If you would like to learn more about this product innovation please contact us on 01786 471586.

*A Business Built on Air*

### EPS Benefits

-  Food safe
-  Excellent Insulating Properties
-  Lightweight
-  Strong and Impact Resistance
-  Water Resistant
-  Environmentally Safe
-  Fully Recyclable

### Accreditation

Sunpack EPS Packaging is food safe assured to BRC Global Standard. All sites manufacture under Quality Control and Environmental Management Systems.

 **BRC**
